Product description:

IOTSU® L3 AQ01 is a wireless indoor device designed for measuring and recording of changes in air quality for statistical analysis or monitoring purposes. Air quality is assessed as a combination of temperature, humidity, the concentration of carbon dioxide, and the concentration of volatile organic compound (VOC).

The device can be mounted on any surface within the monitored building. Installation of this maintenance-free device is quick and easy. Transmission and measurement cycles can be adjusted according to the need.

IOTSU® L3 uses the global LoRaWAN network connection. There is no need for external power supply. Depending on transmission settings and environmental factors the battery of the device can last 5 years.
