Connected buttons Smilio A - Timestamp

Real-time monitoring of staff interventions

Smilio A – Timestamp is a system of 5 connected buttons which guarantees a more efficient monitoring of staff interventions, notably on distant sites: proof of presence (clocking of arrivals / departures), authentication through a unique 5-digit code. The central button can be configured as a call button or report any problem that needs a particular corrective action. Thanks to an integrated badging device, **Smilio A** can also be used by employees equipped with magnetic badges. Some SMS/Email alerts can be automatically triggered in case of abnormalities, thereby enabling better emergency management (replacements, delays) and appropriate communication towards final customers. With **Smilio A - Timestamp**, you likely have trusted indicators to demonstrate your engagements and optimize your quality of service.

Unique benefits combining simplicity and performance

Dual mode Sigfox / LoRaWAN wireless technology. No wifi, no 3/4G, no infrastructure work required before installation

Inopportune voting filtration system

"Proof of Presence" Technology: integrated magnetic sensor for staff time-stamping
Remote configuration via Downlink

Buttons without moving parts for record hygiene and durability

Indoor or outdoor installation (IP65). Resistant to temperatures from -25°C to +70°C

Up to 6 years battery life (not included - on quotation)

Example of customized keypad

- Communication: LoRaWAN / Sigfox networks (EU863-870 - US902-928 - AS923)
- Material: antistatic and anti-UV ABS polymer
- Box color: white
- Dimensions: 100 x 100 x 45 mm
- Weight: less than 200 g (without batteries)
- 3 LED lights for the confirmation of votes
- Battery type: 3,6 V AA Lithium Thionyle Chloride

Made in France and CE certified

Data access

{ api } Through our API: your data ready to be integrated in your information system

Integration and restitution of data directly in your systems and your business softwares
